

Bringing people together with Open Source

Ori Rabin
Freddy Rolland

ROSE

Red Hat Open Source Education

Exposing kids to open
source and promoting
coding education

Collaboration
between Ra'anana
and Tira

Course structure

Screening exam

Laptops with Fedora

Homework

Frontal lessons

Diversity

Culture

Gender

Language

Level of
coding

Obstacles

Language barrier

Level of coding

Holidays & school work

Teenagers

Lessons learned

Pairs of students
from each school

Multilanguage
WhatsApp group

Two native Arabic
speaking mentors

Competitions

Why Open Source?

Industry standard

Professional skills

Community

Collaboration

How to make it fun?

The car race

<https://github.com/RedHat-Israel/ROSE>

CODE SNIPPET

```
bad_stuff = (obstacles.CRACK, obstacles.TRASH,
obstacles.BIKE, obstacles.WATER, obstacles.BARRIER)
breakable_bad_stuff = (obstacles.CRACK, obstacles.WATER)

linux = obstacles.PENGUIN
pickup = actions.PICKUP
none = actions.NONE

stack = actions.NONE

def drive(world):
    action = actions.NONE
    car = world.car
    x = car.x
    y = car.y
    print "my coords are %s,%s; my stack says " % (x,y)
    checklinux(world, x, y)
    if(stack != actions.NONE):
        return stack

    if(world.get((x, y - 1)) in bad_stuff):
        chkml = False
        doaction = True
        try:
            world.get((x - 1, y - 1))
            chkml = True
        except (IndexError):
            pass
        try:
            if (world.get((x, y - 1)) in
```

Collaboration

1 site manager
